

Gift for Life 2023/2024

from Sr Rose Victoria Wanjiru Kuria

An update of expenditure and those supported by GfL

This lady has been supported by GfL. She is grossly disabled we bought her a small piece of land mobilised the CITY and a house was put up. She gets medical care, food, and all other needs including transportation. I had tried to get Government help for her but in vain. Her mother ran away and abandoned her. When I was going around villages on health care visits taking care of children hidden in houses due to severe disability; I found her. Since then, we have taken care of her.

This is a sad story. Imagine the mother of this family died of hunger: this was when the boy was a baby and he was found suckling his dead mother. They were staying with a very old grandfather, until I took them to an orphanage. The big girl pictured in orange and her school uniform has just completed High School, though she did not perform well. There were four children in the family the first sister dropped out of school due to early pregnancy which is why I chose to pay for the second girls schooling from GfL.
